

Help me install

How to install Skyfire from your PC

If you do not already have a Skyfire account

After you signed up for Skyfire on our website, we sent you a confirmation email. In that email, you will find a download link to install Skyfire from your PC.

If you have a Skyfire account

1. LOGIN TO YOUR SKYFIRE ACCOUNT at www.skyfire.com/users/login

Click on Download via SMS or PC in the left nav

Click on Download to My PC

Select (the appropriate installation file for your phone):

* Windows Mobile non-touchscreen: Skyfire_6843_SMP50.CAB

* Windows Mobile touchscreen: Skyfire_6843_PPC50.CAB

* Symbian Phone: Skyfire_Symbian_5578-S60.sisx

Click on Download

2. TRANSFER INSTALLER FILE TO PHONE

Transfer the installer file to Phone (*.cab for WinMo or *.sisx for Symbian)

WinMo users should transfer the file using ActiveSync into the My Documents folder

Choose to install to DEVICE (Skyfire requires ~10MB free memory on your device to function properly)

Follow the installation instructions

Agree to the Software Evaluation & Confidentiality Agreement

3. LAUNCH SKYFIRE
